with relevant news and information about product releases,
important KB articles, and other support-related information.

## Recent Product Releases

- Control Center 1.2.0 Release Notes / Resource Manager 5.2.0
  Release Notes - Control Center 1.2.0 includes numerous fixes
  and enhancements around scalability, performance, and
  security. Resource Manager 5.2.0 includes a large number of
  fixes and enhancements, including improved UI scalability and
  several service library upgrades (OpenTSDB, Logstash, Kibana,
  Java, Docker, Twisted, Nginx).

A Service Impact 5.1.5 Release Notes - This maintenance release
of Impact includes UI and back-end fixes

## News for 5.x

- [How To Use The Docker - Devicemapper Discard Setting (For Docker Thinpool)](#) - This setting will help reclaim space on your docker thin pools, which can help you avoid dangerous filesystem space exhaustion which can lead to service outages and data corruption.
- [ZooKeeper Configuration - All Delegates, Including Non-Quorum Members Need Configuration](#) - Since all serviced instances rely on Zookeeper, it's important that they are all configured to use all available Zookeeper instances.
- [Zenoss 5.1.x and 5.2.0 HA must Upgrade Serviced Resource Agent to Latest Version](#) - In order to fix an issue with the serviced not releasing NFS locks in HA deployments, customers running HA in 5.1.x and 5.2.0 should upgrade the serviced resource agent.
